**Navigation** – Part Number: 4066010-9xx (TCAS Computer).

**Subject:** Announcement of Limited Service for TCAS II Computer Unit, 4066010-9xx.

## Detailed Explanation:

The 4066010-9xx TCAS Computer is no longer produced by ACSS and has not been in production for a number of years. This TNL is to announce that the 4066010-9xx P/N is now moving into an “Obsolete – Limited Service” category due to the limited availability of parts to maintain the TCAS Computer in repairable condition.

The “Obsolete - Limited Service” category is the third step in a process that will eventually lead to part number 4066010-9xx becoming no longer serviceable.

For those customers who installed the 4066010 TCAS computer unit under an ACSS-owned STC, it is possible to replace the unit with an ACSS P/N 7517900 (TCAS 2000 Computer Unit) with no further certification or installation effort. ACSS should be contacted for replacement options and the certification implications by operators who:

- a) Did not have their TCAS installed under an ACSS STC OR
- b) Operators who DID have their TCAS installed under an ACSS STC that want to explore options other than a TCAS 2000 replacement.

## ACSS defines these Categories as:

*Limited production:* special order only, long lead time, LRU still repairable at ACSS Authorized Service Centers.

*Out of production:* unit no longer built by ACSS factory, but spare parts and new “piece parts” for repairs are still available

*Obsolete – limited service:* limited availability of new “piece parts” for repairs, used parts for repairs still available

*Obsolete – no longer serviceable:* “piece parts” for repairs no longer available, may be exchanged for another serviceable unit, but is subject to availability.

Please contact ACSS Technical Support with questions or to request further information on the above subject. Telephone: +1 (623) 445-7070 or Email: [crc.acss@L-3com.com](mailto:crc.acss@L-3com.com).
