

WORTHINGTON[™]

AVIATION

The Trusted Source[™]
for your Saab 340.

Worthington Aviation – Customized Parts Program (CPP)

With over ten years of experience in every dimension of Saab sales and service, we have an unparalleled and comprehensive knowledge of this aircraft. With our CPP solution, we develop a customized program designed specifically to support your Saab 340 fleet. Our program emphasizes maximum service levels for fleet dispatch completions and in-service aircraft, and zero delays and cancellations due to parts.

Global Leader

Worthington Aviation has one of the largest regional aircraft inventories in the industry. Our extensive Saab 340 inventory and rotatable exchange pool provides what you need, when you need it, where you need it. With regional hubs located in Central Europe, Australia and our headquarters near the Minneapolis-St. Paul International (MSP) Airport, our global presence provides you with quick delivery and logistical support. Saab 340 operators worldwide trust Worthington for our competence and commitment to service.

The Program

With the Worthington Customized Parts Program, we use proprietary models to comprehensively analyze parts usage data, based on your removals and fleet industry reliability trends. This analysis results in a tailored solution specific to your fleet, identifying both high usage parts which will be placed at your facility and lower utilization components which will be available at a regional hub upon request for same day shipping. The program identifies an annual allowance for your customized parts list based on our parts requirements analysis resulting in an agreed upon hourly rate to meet your budget requirements. We guarantee parts availability in writing. We also tailor programs for Landing Gear giving you a single source solution for all critical components.

The Difference

Worthington's CPP is raising the bar with 6 month / 1000 hour warranties on all components, 24/7 sales support and same day shipping for replenishment. Our Program is so unique, so specific to your needs that we offer free shipping, no restocking fees, and no AOG fees and guaranteed availability. Our tailored approach to component reliability allows us to pass the savings onto you in a single solution by monitoring your usage data to prevent problems before they occur. We dedicate our professional knowledge and experience to giving you confidence and value in your transaction. With Worthington Aviation, everyone wins.
